Prestige Consumer Healthcare Inc. Notes to Condensed Consolidated Financial Statements (unaudited)

1. Business and Basis of Presentation

Nature of Business

Prestige Consumer Healthcare Inc. (referred to herein as the "Company" or "we," which reference shall, unless the context requires otherwise, be deemed to refer to Prestige Consumer Healthcare Inc. and all of its direct and indirect 100% owned subsidiaries on a consolidated basis) is engaged in the development, manufacturing, marketing, sales and distribution of over-the-counter ("OTC") healthcare products to mass merchandisers, drug, food, dollar, convenience and club stores and e-commerce channels in North America (the United States and Canada), and in Australia and certain other international markets. Prestige Consumer Healthcare Inc. is a holding company with no operations and is also the parent guarantor of the senior credit facility and the senior notes described in Note 7 to these Condensed Consolidated Financial Statements.

Coronavirus Outbreak

In January 2020, the World Health Organization ("WHO") announced a global health crisis due to a new strain of coronavirus ("COVID-19"). In March 2020, the WHO classified the COVID-19 outbreak as a pandemic. This pandemic is affecting the United States and global economies, including causing significant volatility in the global economy and resulting in materially reduced economic activity since early 2020. The COVID-19 pandemic and the corresponding government responses have also led to increased unemployment, which led to a reduction in consumer spending. Economic conditions are, and we expect that they will continue to be, highly volatile and uncertain and could continue to reduce demand for our products and put downward pressure on prices. We did see an increase in sales at the end of March 2020 related to shelter-at-home restrictions as we believe consumers stocked up as a result of COVID-19, followed by a temporary but significant decline in consumption in the first quarter. Since then, we have seen more stable consumer consumption and customer orders. Sales have varied throughout the year with some categories positively impacted (for instance, Women's Health, Oral Care and Dermatological) and some categories negatively impacted (for instance, Cough & Cold, and Gastrointestinal). The positively impacted categories benefited from the consumer shift to over-the-counter healthcare products as consumers increased their focus on hygiene and self-care at home related to COVID-19. The declining categories were impacted by reduced incidence levels and usage rates due to shelter-at-home restrictions and limited travel related to COVID-19. Early in our first quarter of fiscal 2021, we received reports of an increase in absenteeism at our distribution center and with some of our suppliers; however, we have not experienced a material disruption to our overall supply chain to date. We have continued to see changes in the purchasing patterns of our consumers, including the frequency of visits by consumers to retailers and a shift in many markets to purchasing our products online. To date the pandemic has not had a material negative impact on our operations, overall demand for most of our products or resulting aggregate sales and earnings, and, as such, it has also not negatively impacted our liquidity position. We continue to generate operating cash flows to meet our short-term liquidity needs. These circumstances could change in this dynamic, unprecedented environment. If the outbreak continues to spread, it may materially affect our operations and those of third parties on which we rely, including causing disruptions in the supply and distribution of our products. We may need to limit operations and may experience material limitations in employee resources. The extent to which COVID-19 impacts our results and liquidity will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of COVID-19, and the actions to contain COVID-19 or treat its impact, among others. We do not yet know the full extent of its impacts on our business or the global economy. However, these effects could have a material, adverse impact on our liquidity, capital resources, and results of operations and those of the third parties on which we rely.

Basis of Presentation

The unaudited Condensed Consolidated Financial Statements presented herein have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial reporting and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. All significant intercompany transactions and balances have been eliminated in consolidation. In the opinion of management, these Condensed Consolidated Financial Statements include all adjustments, consisting of normal recurring adjustments, that are considered necessary for a fair statement of our consolidated financial position, results of operations and cash flows for the interim periods presented. Our fiscal year ending or ended on March 31st of each year. References in these Condensed Consolidated Financial Statements or related notes to a year (e.g., 2021) mean our fiscal year ending or ended on March 31st of that year. Operating results for the nine months ended December 31, 2020 are not necessarily indicative of results that may be expected for the fiscal year ending March 31, 2021. These unaudited Condensed Consolidated Financial Statements and related notes should be read in conjunction with our audited Consolidated Financial Statements and notes thereto included in our Annual Report on Form 10-K for the fiscal year ended March 31, 2020.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on our knowledge of current events and actions that we may undertake in the future, actual results could differ from those estimates. Our most significant estimates include those made in connection with the valuation of intangible assets, stock-based compensation, fair value of debt, sales returns and allowances, trade promotional allowances, inventory obsolescence, and accounting for income taxes and related uncertain tax positions.

Recently Adopted Accounting Pronouncements

In August 2018, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2018-13, *Fair Value Measurement (Topic 820): Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement.* The amendments in this update modify the disclosure requirements in Topic 820, with a particular focus on Level 3 investments, by eliminating certain required disclosures and incorporating others. The amendments are effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. We adopted this standard effective April 1, 2020, and the adoption did not have a material impact on our Consolidated Financial Statements.

In June 2016, the FASB issued ASU 2016-13, *Financial Instruments - Credit Losses (Topic 326) - Measurement of Credit Losses on Financial Instruments* (with subsequent targeted amendments). The amendments in this update provide financial statement users with more useful information about expected credit losses on financial instruments and other commitments to extend credit held by a reporting entity at each reporting date. The guidance requires entities to utilize an expected credit loss model for certain financial instruments, including most trade receivables, which replaces the incurred credit loss model previously used. Under this new model, we are required to recognize estimated credit losses expected to occur over time using a broad range of information including historical information, current conditions and reasonable and supportable forecasts. The amendments in these updates were effective for us in the first quarter of our fiscal year 2021. We adopted this standard effective April 1, 2020, and the adoption did not have a material impact on our Consolidated Financial Statements.

Recently Issued Accounting Pronouncements

In August 2018, the FASB issued ASU 2018-14, Compensation - Retirement Benefits - Defined Benefit Plans - General (Topic 715-20): Disclosure Framework - Changes to the Disclosure Requirements for Defined Benefit Plans. The amendments in this update modify the disclosure requirements for employers that sponsor defined benefit pension or other postretirement plans by eliminating certain required disclosures and incorporating others. The amendments are effective for public companies for fiscal years ending after December 15, 2020. We do not expect the adoption of this standard to have a material impact on our Consolidated Financial Statements.

In December 2019, the FASB issued ASU 2019-12, *Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes*. The amendments in this update eliminate the need for an organization to analyze whether certain exceptions apply for tax purposes. It also simplifies GAAP for certain taxes. The amendments in these updates are effective for us for fiscal years beginning after December 15, 2020, including interim periods within those fiscal years. We do not expect the adoption of this standard to have a material impact on our Consolidated Financial Statements.

In March 2020, the FASB issued ASU 2020-04, *Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting.* The amendments in this update are elective and apply to all entities that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued. The amendments in this update provide temporary optional guidance to ease the potential burden in accounting for reference rate reform. An entity may elect to apply the amendments prospectively through December 31, 2022. We are currently evaluating the impact of adopting this guidance on our Consolidated Financial Statements.

2. Inventories

Inventories consist of the following:

<u>(In thousands)</u>	December 31, 2020	March 31, 2020
Components of Inventories		
Packaging and raw materials	\$ 8,370	\$ 9,803
Work in process	321	355
Finished goods	108,320	105,868
Inventories	\$ 117,011	\$ 116,026

Inventories are carried and depicted above at the lower of cost or net realizable value, which includes a reduction in inventory values of \$4.1 million and \$6.5 million at December 31, 2020 and March 31, 2020, respectively, related to obsolete and slow-moving inventory.

3. Goodwill

A reconciliation of the activity affecting goodwill by operating segment is as follows:

Consolidated
\$ 738,890
(163,711)
575,179
4,380
743,270
(163,711)
\$ 579,559
5

On an annual basis during the fourth quarter of each fiscal year, or more frequently if conditions indicate that the carrying value of the asset may not be recoverable, management performs a review of the values assigned to goodwill and tests for impairment. On February 29, 2020, the date of our annual impairment review, there were no indicators of impairment as a result of the analysis and, accordingly, no impairment charge was taken on our March 31, 2020 financial statements. We utilize the discounted cash flow method to estimate the fair value of our reporting units as part of the goodwill impairment test. We also considered our market capitalization at February 29, 2020 as compared to the aggregate fair values of our reporting units, to assess the reasonableness of our estimates pursuant to the discounted cash flow methodology. The estimates and assumptions made in assessing the fair value of our reporting units and the valuation of the underlying assets and liabilities are inherently subject to significant uncertainties. Consequently, changing rates of interest and inflation, declining sales or margins, increasing competition, changing consumer preferences, technical advances, or reductions in advertising and marketing may require an impairment charge to be recorded in the future. We continuously monitor events which could trigger an interim impairment analysis, which included the impact of COVID-19 for the period ended December 31, 2020. As of December 31, 2020, we determined no events have occurred that would indicate potential impairment of goodwill. However, the continued duration and severity of COVID-19 may result in future impairment charges as the prolonged pandemic could have an impact on our results due to changes in consumer habits. This could result in changes to the assumptions utilized in the annual impairment analysis to determine the estimated fair value of our goodwill, including long-term growth rates and discount rates.

4. Intangible Assets, net

A reconciliation of the activity affecting intangible assets, net is as follows:

<u>(In thousands)</u>	Indefinite- Lived Trademarks]	Finite-Lived Frademarks and Customer Relationships	Totals

Intangible assets, net - December 31, 2020	\$ 2,283,131	\$	198,594	\$ 2,481,725

Amortization expense was \$4.9 million and \$14.7 million for the three and nine months ended December 31, 2020, respectively, and \$4.9 million and \$14.7 million for the three and nine months ended December 31, 2019, respectively.

Finite-lived intangible assets are expected to be amortized over their estimated useful life, which ranges from a period of 10 to 30 years, and the estimated amortization expense for each of the five succeeding years and the periods thereafter is as follows (in thousands):

Amount

4,917 19.670

19,670

19,637

17,592

117,108

198,594

(In thousands) Year Ending March 31, 2021 (remaining three months ended March 31, 2021) 2022 2023 2024 2025 Thereafter

Under accounting guidelines, indefinite-lived assets are not amortized, but must be tested for impairment annually, or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of the asset below the carrying amount. On February 29, 2020, the date of our annual impairment review, there were no indicators of impairment as a result of the analysis and, accordingly, no impairment charge was taken on our March 31, 2020 financial statements. Additionally, at each reporting period, an evaluation must be made to determine whether events and circumstances continue to support an indefinite useful life. Intangible assets with finite lives are amortized over their respective estimated useful lives and are also tested for impairment whenever events or changes in circumstances indicate that the carrying value of the asset may not be recoverable and exceeds its fair value.

We utilize the excess earnings method to estimate the fair value of our individual indefinite-lived intangible assets. The discount rate utilized in the analyses, as well as future cash flows, may be influenced by such factors as changes in interest rates and rates of inflation. Additionally, should the related fair values of intangible assets be adversely affected as a result of declining sales or margins caused by competition, changing consumer preferences, technological advances or reductions in advertising and marketing expenses, we may be required to record impairment charges in the future. During the third quarter of 2021, we determined that the fair value of one of our finite-lived intangible assets in our International OTC Healthcare segment,

Painstop, did not exceed its carrying amount. As such, we recorded an impairment charge of \$1.2 million. The decline in the fair value of *Painstop* was primarily related to a decline in expected future sales due to a regulatory change that now requires *Painstop* to be prescribed by physicians rather than sold over-the-counter direct to consumers.

We continuously monitor events which could trigger an interim impairment analysis, which included the impact of COVID-19 for the period ended December 31, 2020. As of December 31, 2020, no other events have occurred that would indicate potential additional impairment of intangible assets. However, the continued duration and severity of COVID-19 may result in future impairment charges as the prolonged pandemic could have an impact on our results due to changes in consumer habits. This could result in changes to the assumptions utilized in the annual impairment analysis to determine the estimated fair value of our intangible assets, including long-term growth rates and discount rates.

5. Leases

We lease real estate and equipment for use in our operations.

The components of lease expense for the three and nine months ended December 31, 2020 and 2019 were as follows:

	Three Months Er	d December 31,	Nine Months Ended December 31,			
<u>(In thousands)</u>	2020		2019	2020		2019

Less: unamortized debt costs	(11,308)	(14,700)
Long-term debt, net	\$ 1,548,692	\$ 1,730,300

At December 31, 2020, we had no balance outstanding on the asset-based revolving credit facility entered into January 31, 2012, as amended (the "2012 ABL Revolver") and a borrowing capacity of \$123.3 million.

Interest Rate Swaps:

We currently have two interest rate swaps to hedge a total of \$400.0 million of our variable interest debt (see Note 9 for further details).

-12-

As of December 31, 2020, aggregate future principal payments required in accordance with the terms of the 2012 Term B-5 Loans, 2012 ABL Revolver and the indentures governing the senior unsecured notes due 2024 (the "2016 Senior Notes") and the senior unsecured notes due 2028 (the "2019 Senior Notes") are as follows:

<u>(In thousands)</u>	
<u>Year Ending March 31,</u>	Amount

8. Fair Value Measurements

For certain of our financial instruments, including cash, accounts receivable, accounts payable and other current liabilities, the carrying amounts approximate their respective fair values due to the relatively short maturity of these amounts.

FASB Accounting Standards Codification ("ASC") 820, *Fair Value Measurements*, requires fair value to be determined based on the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market assuming an orderly transaction between market participants. ASC 820 established market (observable inputs) as the preferred source of fair value, to be followed by our assumptions of fair value based on hypothetical transactions (unobservable inputs) in the absence of observable market inputs. Based upon the above, the following fair value hierarchy was created:

- Level 1 Quoted market prices for identical instruments in active markets;
- Level 2 Quoted prices for similar instruments in active markets, as well as quoted prices for identical or similar instruments in markets that are not considered active; and
- Level 3 Unobservable inputs developed by us using estimates and assumptions reflective of those that would be utilized by a market participant.

The market values have been determined based on market values for similar instruments adjusted for certain factors. As such, the 2016 Senior Notes, the 2019 Senior Notes, the 2012 Term B-5 Loans, and the 2012 ABL Revolver and our interest rate swaps are measured in Level 2 of the above hierarchy. See summary below detailing the carrying amounts and estimated fair values of these instruments at December 31, 2020 and March 31, 2020.

	December 31, 2020			March 31, 2020				
<u>(In thousands)</u>		Carrying Value		Fair Value		Carrying Value		Fair Value
2016 Senior Notes	\$	600,000	\$	613,500	\$	600,000	\$	603,000
2019 Senior Notes		400,000		421,000		400,000		386,000
2012 Term B-5 Loans		560,000		560,700		690,000		638,250
2012 ABL Revolver		—		—		55,000		55,000
Interest rate swaps		3,269		3,269		6,317		6,317

At December 31, 2020 and March 31, 2020, we did not have any assets or liabilities measured in Level 1 or 3.

9. Derivative Instruments

Changes in interest rates expose us to risks. To help us manage these risks, in January 2020 we entered into two interest rate swaps to hedge a total of \$400.0 million of our variable interest debt. The fair value of these interest rate swaps is reflected in our Consolidated Balance Sheets in other accrued liabilities and other long-term liabilities. We do not use derivatives for trading purposes.

The following tables summarize the fair values of our derivative instruments as of the end of the periods shown:

-13-

The following table summarizes our interest rate swaps, net of tax, for the periods shown:

Loss Recognized as Expense	Interest expense	\$	(1,415)	\$	—	\$	(3,837)	\$	-	

We expect pre-tax losses of \$3.0 million associated with interest rate swaps, currently reported in accumulated other comprehensive loss, to be reclassified into income over the next twelve months. The amount ultimately realized, however, will differ as interest rates change and the underlying contracts settle.

Counterparty Credit Risk:

Interest rate swaps expose us to counterparty credit risk for non-performance. We manage our exposure to counterparty credit risk by only dealing with counterparties who are substantial international financial institutions with significant experience using such derivative instruments.

10. Stockholders' Equity

We are authorized to issue 250.0 million shares of common stock, \$0.01 par value per share, and 5.0 million shares of preferred stock, \$0.01 par value per share. The Board of Directors may direct the issuance of the undesignated preferred stock in one or more series and determine preferences, privileges and restrictions thereof.

Each share of common stock has the right to one vote on all matters submitted to a vote of stockholders. The holders of common stock are also entitled to receive dividends whenever funds are legally available and when declared by the Board of Directors, subject to prior rights of holders of all classes of outstanding stock having priority rights as to dividends. No dividends have been declared or paid on our common stock through December 31, 2020.

During the three and nine months ended December 31, 2020 and 2019, we repurchased shares of our common stock and recorded them as treasury stock. Our share repurchases consisted of the following:

Three Months Ended December 31,		Nine Months Ended	ed December 31,

11. Accumulated Other Comprehensive Loss

Accumulated other comprehensive loss consisted of the following at December 31, 2020 and March 31, 2020:

<u>(In thousands)</u>	Decer	nber 31, 2020	March 31, 2020		
Components of Accumulated Other Comprehensive Loss					
Cumulative translation adjustment	\$	(16,802)	\$	(39,241)

Unrecognized net gain (loss) on pension plans, net of tax of \$(624) and \$17, respectively		2,088		(56)	
Accumulated other comprehensive loss, net of tax	\$	(17,231)	\$	(44,161)	

As of December 31, 2020 and March 31, 2020, no amounts were reclassified from accumulated other comprehensive loss into earnings.

12. Earnings Per Share

Basic earnings per share is computed based on income available to common stockholders and the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share is computed based on income available to common stockholders and the weighted average number of shares of common stock outstanding plus the effect of potentially dilutive common shares outstanding during the period using the treasury stock method, which includes stock options and restricted stock units ("RSUs"). Potential common shares, composed of the incremental common shares issuable upon the exercise of outstanding stock options and unvested RSUs, are included in the diluted earnings per share calculation to the extent that they are dilutive. In loss periods, the assumed exercise of in-the-money stock options and RSUs has an anti-dilutive effect, and therefore these instruments are excluded from the computation of diluted earnings per share.

The following table sets forth the computation of basic and diluted earnings per share:

	Thre	e Months En	ded D	ecember 31,	Nine Months Ended December 31				
<u>(In thousands, except per share data)</u>		2020		2019		2020		2019

Dilutive effect of unvested restricted stock units and options issued to employees and directors		349		453		367		386	
Denominator for diluted earnings per share		50,561		50,831		50,635		51,226	
Earnings per Common Share:									
Basic earnings per share	\$	0.81	\$	0.76	\$	2.57	\$	2.07	
Diluted earnings per share	\$	0.81	\$	0.75	\$	2.55	\$	2.05	

For the three months ended December 31, 2020 and 2019, there were 0.6 million and 0.6 million shares, respectively, attributable to outstanding stockbased awards that were excluded from the calculation of diluted earnings per share because their inclusion would have been anti-dilutive. For the nine months ended December 31, 2020 and 2019, there were 0.6 million and 0.9 million shares, respectively, attributable to outstanding stock-based awards that were excluded from the calculation of diluted earnings per share because their inclusion would have been anti-dilutive.

13. Share-Based Compensation

In connection with our initial public offering, the Board of Directors adopted the 2005 Long-Term Equity Incentive Plan (the "2005 Plan"), which provided for grants of up to a maximum of 5.0 million shares of restricted stock, stock options, RSUs and other equity-based awards. In June 2014, the Board of Directors approved, and in July 2014, our stockholders ratified, an increase of an additional 1.8 million shares of our common stock for issuance under the 2005 Plan, an increase of the maximum number of shares subject to stock options that could be awarded to any one participant under the 2005 Plan during any fiscal 12-month period from 1.0 million to 2.5 million shares, and an extension of the term of the 2005 Plan by ten years, to February 2025. Directors, officers and other employees of the Company and its subsidiaries, as well as others performing services for the Company, were eligible for grants under the 2005 Plan.

On June 23, 2020, the Board of Directors adopted the Prestige Consumer Healthcare Inc. 2020 Long-Term Incentive Plan (the "2020 Plan"). The 2020 Plan became effective on August 4, 2020, upon the approval of the 2020 Plan by our stockholders. A total of 2,827,210 shares are available for issuance under the 2020 Plan (comprised of 2,000,000 new shares plus 827,210 shares that were unissued under the 2005 Plan). All future equity awards will be made from the 2020 Plan, and the Company will not grant any additional awards under the 2005 Plan.

The following table provides information regarding our stock-based compensation:

	Three Months Ended December 31,				Nine Months Ended December 31,					
<u>(In thousands)</u>		2020		2019	 2020		2019			
Pre-tax share-based compensation costs charged against income	\$	1,588	\$	1,780	\$ 5,944	\$	5,682			
Income tax benefit recognized on compensation costs	\$	263	\$	275	\$ 826	\$	886			
Total fair value of options and RSUs vested during the period	\$	_	\$	465	\$ 6,796	\$	7,830			
Cash received from the exercise of stock options	\$	39	\$	463	\$ 1,324	\$	1,007			
Tax benefits realized from tax deductions resulting from RSU issuances and stock option exercises	\$	15	\$	105	\$ 963	\$	587			

At December 31, 2020, there were \$7.9 million of unrecognized compensation costs related to unvested share-based compensation arrangements under the 2005 Plan, based on management's estimate of the shares that will ultimately vest. We expect to recognize such costs over a weighted average period of 1 year. At December 31, 2020, there were 2.8 million shares available for issuance under the 2020 Plan.

On May 4, 2020, the Compensation and Talent Management Committee (the "Committee") of our Board of Directors granted 79,070 performance stock units, 73,636 RSUs and stock options to acquire 249,875 shares of our common stock under the 2005 Plan to certain executive officers and employees. Performance units are earned based on achievement of the performance objectives set by the Committee and, if earned, vest in their entirety on the threeyear anniversary of the date of grant. In light of the uncertain economic environment, the Committee elected to set the performance objectives applicable to these awards at a later date. The stock options were granted at an exercise price of \$39.98 per share, which was equal to the closing price for our common stock on the date of the grant.

A newly appointed independent member of the Board of Directors received a grant under the 2005 Plan of 907 RSUs on May 4, 2020.

On August 4, 2020, each of the independent members of the Board of Directors received a grant of 3,732 RSUs under the 2020 Plan. The RSUs are fully vested upon receipt of the award and will be settled by delivery to each director of one share of our common stock for each vested RSU promptly following the earliest of (i) such director's death, (ii) such director's separation from service or (iii) a change in control of the Company.

Restricted Stock Units

The fair value of the RSUs is determined using the closing price of our common stock on the date of the grant. A summary of the RSUs granted under the 2005 Plan and the 2020 Plan is presented below:

RSUs	Shares (in thousands)	Weighted Average Grant-Date Fair Value

The aggregate intrinsic value of options exercised during the nine months ended December 31, 2020 was \$1.3 million.

14. Income Taxes

On December 22, 2017, the Tax Cuts and Jobs Act was signed into law. The Tax Cuts and Jobs Act, among other things, reduced the U.S. federal corporate tax rate from 35% to 21% and imposed a new minimum tax on Global Intangible Low-Taxed Income ("GILTI") earned by foreign subsidiaries. In July 2020, final regulations were issued for GILTI, which include a high-tax exception for certain income earned by foreign subsidiaries if the foreign tax rate is in excess of 90% of the U.S. corporate tax rate of 21%. We calculated the potential impact of these final regulations and accounted for those impacts in the quarterly provision for the period ended September 30, 2020.

Income taxes are recorded in our quarterly financial statements based on our estimated annual effective income tax rate, subject to adjustments for discrete events, should they occur. The effective tax rates used in the calculation of income taxes were 23.9% and 24.7% for the three months ended December 31, 2020 and 2019, respectively. The effective tax rates used in the calculation of income taxes were 21.1% and 25.2% for the nine months ended December 31, 2020 and 2019, respectively. The decrease in the effective tax rate for the nine months ended December 31, 2020 versus the prior year period was primarily due to the final GILTI regulations issued in July 2020, which resulted in the release of the valuation allowance on foreign tax credit carryforwards of \$5.1 million.

15. Employee Retirement Plans

The primary components of Net Periodic Benefits consist of the following:

	Three Months Ended December 31,					Nine Months Ended December 31,				
<u>(In thousands)</u>		2020		2019		2020		2019		
Interest cost	\$	283	\$	575	\$	1,333	\$	1,729		
Expected return on assets		(653)		(722)		(1,947)		(2,164)		
Net periodic benefit income	\$	(370)	\$	(147)	\$	(614)	\$	(435)		

During the nine months ended December 31, 2020, we contributed \$0.3 million to our non-qualified defined benefit plan and \$3.0 million to the qualified defined benefit plan. During the remainder of fiscal 2021, we expect to contribute an additional \$0.1 million to our non-qualified plan and make no further contribution to the qualified plan.

During the third quarter of 2021, we offered participants of our qualified defined benefit plan the option to receive a lump sum payout of their benefits. The amount paid out of plan assets during the third quarter of 2021 to those who elected to take the lump sum payout was \$7.0 million and we recognized a settlement gain of \$0.2 million as a result of the payout.

16. Commitments and Contingencies

We are involved from time to time in legal matters and other claims incidental to our business. We review outstanding claims and proceedings internally and with external counsel as necessary to assess the probability and amount of a potential loss. These assessments are re-evaluated at each reporting period and as new information becomes available to determine whether a reserve should be established or if any existing reserve should be adjusted. The actual cost of resolving a claim or proceeding ultimately may be substantially different than the amount of the recorded reserve. In addition, because it is not permissible under GAAP to establish a litigation reserve until the loss is both probable and estimable, in some cases there may be insufficient time to establish a reserve prior to the actual incurrence of the loss (upon verdict and judgment at trial, for example, or in the case of a quickly negotiated settlement). We believe the reasonably possible losses from resolution of routine legal matters and other claims incidental to our business, taking our reserves into account, will not have a material adverse effect on our business, financial condition, or results of operations.

17. Concentrations of Risk

Our revenues are concentrated in the area of OTC Healthcare. We sell our products to mass merchandisers, drug, food, dollar, convenience and club stores and e-commerce channels. During the three and nine months ended December 31, 2020, approximately 43.6% and 45.6%, respectively, of our gross revenues were derived from our five top selling brands. During the three and nine months ended December 31, 2019, approximately 41.7% and 42.8%, respectively of our gross revenues were derived from our five top selling brands. One customer, Walmart, accounted for more than 10% of our gross revenues for the three and nine months ended December 31, 2020. Walmart accounted for approximately 20.7% and 21.7%, respectively, of our gross revenues for the three and nine months ended December 31, 2020. Walmart accounted for approximately 23.2% and 23.4%, respectively, of our gross revenues for the three and nine months ended December 31, 2019.

Our product distribution in the United States is managed by a third party through one primary distribution center in Clayton, Indiana. In addition, we operate one manufacturing facility for certain of our products located in Lynchburg, Virginia. A natural disaster, such as tornado, earthquake, flood, or fire, could damage our inventory and/or materially impair our ability to distribute our products to customers in a timely manner or at a reasonable cost. In addition, a serious disruption caused by performance or contractual issues with our third party distribution manager or COVID-19 or other public health emergencies could also materially impact our product distribution. Any disruption as a result of third party performance at our distribution center could result in increased costs, expense and/or shipping times, and could cause us to incur customer fees and penalties. In addition, any serious disruption to our Lynchburg manufacturing facility could materially impair our ability to provide those products to customers in a timely manner or at a reasonable cost. We could also incur significantly higher costs and experience longer lead times if we need to replace our distribution center, the third party distribution manager or the manufacturing facility. As a result, any serious disruption could have a material adverse effect on our business, financial condition and results of operations.

At December 31, 2020, we had relationships with 113 third party manufacturers. Of those, we had long-term contracts with 18 manufacturers that produced items that accounted for approximately 68.9% of gross sales for the nine months ended December 31, 2020. At December 31, 2019, we had relationships with 113 third party manufacturers. Of those, we had long-

-19-

term contracts with 17 manufacturers that produced items that accounted for approximately 66.2% of gross sales for the nine months ended December 31, 2019. The fact that we do not have long-term contracts with certain manufacturers means that they could cease manufacturing our products at any time and for any reason or initiate arbitrary and costly price increases, which could have a material adverse effect on our business and results of operations. Although we are continually in the process of negotiating long-term contracts with certain key manufacturers, we may not be able to reach a timely agreement, which could have a material adverse effect on our business and results of operations.

18. Business Segments

Segment information has been prepared in accordance with the Segment Reporting topic of the FASB ASC 280. Our current reportable segments consist of (i) North American OTC Healthcare and (ii) International OTC Healthcare. We evaluate the performance of our operating segments and allocate resources to these segments based primarily on contribution margin, which we define as gross profit less advertising and marketing expenses.

The tables below summarize information about our reportable segments.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of our financial condition and results of operations should be read together with the Condensed Consolidated Financial Statements and the related notes included in this Quarterly Report on Form 10-Q, as well as our Annual Report on Form 10-K for the fiscal year ended March 31, 2020. This discussion and analysis may contain forward-looking statements that involve certain risks, assumptions and uncertainties. Future results could differ materially from the discussion that follows for many reasons, including the factors described in Part I, Item 1A. "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended March 31, 2020 and in future reports filed with the U.S. Securities and Exchange Commission ("SEC").

See also "Cautionary Statement Regarding Forward-Looking Statements" on page 35 of this Quarterly Report on Form 10-Q.

Unless otherwise indicated by the context, all references in this Quarterly Report on Form 10-Q to "we," "us," "our," the "Company" or "Prestige" refer to Prestige Consumer Healthcare Inc. and our subsidiaries. Similarly, reference to a year (e.g., 2021) refers to our fiscal year ended March 31 of that year.

General

We are engaged in the development, manufacturing, marketing, sales and distribution of well-recognized, brand name over-the-counter ("OTC") healthcare products to mass merchandisers, drug, food, dollar, convenience, and club stores and e-commerce channels in North America (the United States and Canada) and in Australia and certain other international markets. We use the strength of our brands, our established retail distribution network, a low-cost operating model and our experienced management team to our competitive advantage.

We have grown our brand portfolio both organically and through acquisitions. We develop our existing brands by investing in new product lines, brand extensions and strong advertising support. Acquisitions of OTC brands have also been an important part of our growth strategy. We have acquired strong and well-recognized brands from consumer products and pharmaceutical companies, as well as private equity firms. While many of these brands have long histories of brand development and investment, we believe that, at the time we acquired them, most were considered "non-core" by their previous owners. As a result, these acquired brands did not benefit from adequate management focus and marketing support during the period prior to their acquisition, which created opportunities for us to reinvigorate these brands and improve their performance post-acquisition. After adding a core brand to our portfolio, we seek to increase its sales, market share and distribution in both existing and new channels through our established retail distribution network. We pursue this growth through increased spending on advertising and marketing support, new sales and marketing strategies, improved packaging and formulations, and innovative development of brand extensions.

Coronavirus Outbreak

In January 2020, the World Health Organization ("WHO") announced a global health crisis due to a new strain of coronavirus ("COVID-19"). In March 2020, the WHO classified the COVID-19 outbreak as a pandemic. This pandemic is affecting the United States and global economies, including causing significant volatility in the global economy and resulting in materially reduced economic activity since early 2020. The COVID-19 pandemic and the corresponding government responses have also led to increased unemployment, which led to a reduction in consumer spending. Economic conditions are, and we expect that they will continue to be, highly volatile and uncertain and could continue to reduce demand for our products and put downward pressure on prices. We did see an increase in sales at the end of March 2020 related to shelter-at-home restrictions as we believe consumers stocked up as a result of COVID-19, followed by a temporary but significant decline in consumption in the first quarter. Since then, we have seen more stable consumer consumption and customer orders. Sales have varied throughout the year with some categories positively impacted (for instance, Women's Health, Oral Care and Dermatological) and some categories negatively impacted (for instance, Cough & Cold, and Gastrointestinal). The positively impacted categories benefited from the consumer shift to over-the-counter healthcare products as consumers increased their focus on hygiene and self-care at home related to COVID-19. The declining categories were impacted by reduced incidence levels and usage rates due to shelter-at-home restrictions and limited travel related to COVID-19. Early in our first quarter of fiscal 2021, we received reports of an increase in absenteeism at our distribution center and with some of our suppliers; however, we have not experienced a material disruption to our overall supply chain to date. We have continued to see changes in the purchasing patterns of our consumers, including the frequency of visits by consumers to retailers and a shift in many markets to purchasing our products online. To date the pandemic has not had a material negative impact on our operations, overall demand for most of our products or resulting aggregate sales and earnings, and, as such, it has also not negatively impacted our liquidity position. We continue to generate operating cash flows to meet our short-term liquidity needs. These circumstances could change in this dynamic, unprecedented environment. If the outbreak continues to spread, it may materially affect our operations and those of

third parties on which we rely, including causing disruptions in the supply and distribution of our products. We may need to limit operations and may experience material limitations in employee resources. The extent to which COVID-19 impacts our results and liquidity will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of COVID-19, and the actions to contain COVID-19 or treat its impact, among others. We do not yet know the full extent of its impacts on our business or the global economy. However, these effects could have a material, adverse impact on our liquidity, capital resources, and results of operations and those of the third parties on which we rely.

Tax Regulations

On December 22, 2017, the Tax Cuts and Jobs Act was signed into law. The Tax Cuts and Jobs Act, among other things, reduced the U.S. federal corporate tax rate from 35% to 21% and imposed a new minimum tax on Global Intangible Low-Taxed Income ("GILTI") earned by foreign subsidiaries. On July 20, 2020, final regulations were issued for GILTI which include a high-tax exception for income earned by foreign subsidiaries if the foreign tax rate is in excess of 90% of the U.S. tax rate of 21%. We calculated the potential impact of these final regulations and accounted for those impacts in the quarterly provision for the period ended September 30, 2020.

Total segment revenues for the three months ended December 31, 2020 were \$238.8 million, a decrease of \$2.8 million, or 1.1%, versus the three months ended December 31, 2019. The \$2.8 million decrease was related to the decrease in our North American OTC Healthcare segment, partly offset by an increase in our International OTC Healthcare segment.

North American OTC Healthcare Segment

Revenues for the North American OTC Healthcare segment decreased \$4.3 million, or 2.0%, during the three months ended December 31, 2020 versus the three months ended December 31, 2019. The three months ended December 31, 2020 were negatively impacted by the Cough & Cold category, but were partly offset by the higher Women's Health and Oral Care revenues. The Cough & Cold category was impacted by reduced incidence levels and usage rates due to shelter-at-home restrictions and limited travel related to COVID-19. The positively impacted categories benefited from the consumer shift to over-the-counter healthcare products as consumers increased their focus on hygiene and self-care at home related to COVID-19.

International OTC Healthcare Segment

Revenues for the International OTC Healthcare segment increased \$1.5 million, or 5.7%, during the three months ended December 31, 2020 versus the three months ended December 31, 2019. The \$1.5 million increase was attributable to increased sales in our Australian subsidiary primarily related to increase in sales of Hydralyte. The increase in sales of Hydralyte was related to an easing of shelter-at-home restrictions in Australia.

Gross Profit

The following table presents our gross profit and gross profit as a percentage of total segment revenues, by segment for each of the periods presented.

	Three Months Ended December 31,										
<u>(In thousands)</u>								Increase (Dec	<u>rease)</u>		
Gross Profit		2020	%		2019	%		Amount	%		
North American OTC Healthcare	\$	121,735	57.8	\$	120,955	56.3	\$	780	0.6

	\$	138,887	58.2	\$	137,495	56.9	\$	1,392	1.0		

Gross profit for the three months ended December 31, 2020 was relatively flat, increasing \$1.4 million, or 1.0%, when compared with the three months ended December 31, 2019. As a percentage of total revenues, gross profit increased to 58.2% during the three months ended December 31, 2020, from 56.9% during the three months ended December 31, 2019. The increase in gross profit as a percentage of revenues was primarily a result of the fourth quarter 2020 completion of transitional costs associated with a new warehouse and distribution center.

North American OTC Healthcare Segment

Gross profit for the North American OTC Healthcare segment increased \$0.8 million, or 0.6%, during the three months ended December 31, 2019. As a percentage of North American OTC Healthcare revenues, gross profit increased to 57.8% during the three months ended December 31, 2020 from 56.3% during the three months ended December 31, 2019, primarily due to the fourth quarter 2020 completion of transitional costs associated with a new warehouse and distribution center and improved logistics costs resulting from our warehouse transition.

International OTC Healthcare Segment

Gross profit for the International OTC Healthcare segment increased \$0.6 million, or 3.7%, during the three months ended December 31, 2020 versus the three months ended December 31, 2019. As a percentage of International OTC Healthcare revenues, gross profit decreased to 60.9% during the three months ended December 31, 2020 from 62.0% during the three months ended December 31, 2019, primarily due to product mix.

Contribution Margin

Contribution margin is our segment measure of profitability. It is defined as gross profit less advertising and marketing expenses.

The following table presents our contribution margin and contribution margin as a percentage of total segment revenues, by segment for each of the periods presented.

	Three Months Ended December 31,										
<u>(In thousands)</u>							Increase (Decr	ease)			
Contribution Margin	2020	%		2019	%		Amount	%			
North American OTC Healthcare	\$ 88,876	42.2	\$	91,930	42.8	\$	(3,054)	(3.3)

	\$ 100,806	42.2	\$	103,936	43.0	\$	(3,130)	(3.0)			

North American OTC Healthcare Segment

Contribution margin for the North American OTC Healthcare segment decreased \$3.1 million, or 3.3%, during the three months ended December 31, 2020 versus the three months ended December 31, 2019. As a percentage of North American OTC Healthcare revenues, contribution margin decreased to 42.2% during the three months ended December 31, 2020 from 42.8% during the three months ended December 31, 2019. The contribution margin decrease as a percentage of revenues was primarily due to an increase in advertising and marketing expenses, partly offset by the increase in gross profit noted above.

International OTC Healthcare Segment

Contribution margin for the International OTC Healthcare segment decreased \$0.1 million, or 0.6%, during the three months ended December 31, 2020 versus the three months ended December 31, 2019. As a percentage of International OTC

Healthcare revenues, contribution margin decreased to 42.4% during the three months ended December 31, 2020 from 45.0% during the three months ended December 31, 2019. The contribution margin decrease as a percentage of revenues was due to a decrease in gross profit noted above as well as incremental advertising and marketing expense.

General and Administrative

General and administrative expenses of \$21.4 million for the three months ended December 31, 2020 were relatively flat versus \$21.3 million for the three months ended December 31, 2019.

Depreciation and Amortization

Depreciation and amortization expenses were \$6.0 million for the three months ended December 31, 2020 and \$6.2 million for the three months ended December 31, 2019. The decrease in depreciation and amortization was primarily due to certain assets being fully depreciated in the first quarter of fiscal 2021.

Interest Expense, Net

Interest expense, net was \$20.1 million during the three months ended December 31, 2020, versus \$24.3 million during the three months ended December 31, 2019. The average indebtedness decreased to \$1.6 billion during the three months ended December 31, 2020 from \$1.8 billion during the three months ended December 31, 2020 from \$1.8 billion during the three months ended December 31, 2020 from \$1.8 billion during the three months ended December 31, 2020 from \$1.8 billion during the three months ended December 31, 2020 from \$1.8 billion during the three months ended December 31, 2019.

Loss on Extinguishment of Debt

During the three months ended December 31, 2019, we recorded a loss on extinguishment of debt of \$2.2 million to write off the debt costs related to our 5.375% 2013 Senior Notes, which we redeemed in December 2019.

Income Taxes

The provision for income taxes during the three months ended December 31, 2020 was \$12.8 million versus \$12.5 million during the three months ended December 31, 2019. The effective tax rate during the three months ended December 31, 2020 was 23.9% versus 24.7% during the three months ended December 31, 2019. The decrease in the effective tax rate for the three months ended December 31, 2020 was based on our estimated annual effective income tax rate which fluctuates based on the mix of earnings from our U.S. and foreign jurisdictions.

Total Consolidated	\$	705,604	100.0	\$ 711,775	100.0	\$ (6,171)	(0.9)					

Total segment revenues for the nine months ended December 31, 2020 were \$705.6 million, a decrease of \$6.2 million, or 0.9%, versus the nine months ended December 31, 2019. The \$6.2 million decrease was primarily related to our International OTC Healthcare segment.

North American OTC Healthcare Segment

Revenues for the North American OTC Healthcare segment decreased \$1.7 million, or 0.3%, during the nine months ended December 31, 2020 versus the nine months ended December 31, 2019. The nine months ended December 31, 2020 were negatively impacted by lower Cough & Cold and Gastrointestinal revenues, partly offset by positively impacted Women's Health and Oral Care categories. The Cough & Cold and Gastrointestinal categories faced declines in incidence levels and usage rates due to shelter-at-home restrictions and limited travel related to COVID-19. The positively impacted categories benefited from the consumer shift to over-the-counter healthcare products as consumers increased their focus on hygiene and self-care at home related to COVID-19.

International OTC Healthcare Segment

Revenues for the International OTC Healthcare segment decreased \$4.5 million, or 6.2%, during the nine months ended December 31, 2020 versus the nine months ended December 31, 2019. The \$4.5 million decrease was primarily attributable to decreased sales in our Australian subsidiary, primarily related to both lower general consumer illnesses and activities such as athletics resulting from the various social distancing measures brought on by COVID-19.

Gross Profit

The following table presents our gross profit and gross profit as a percentage of total segment revenues, by segment for each of the periods presented.

	Nine Months Ended December 31,										
<u>(In thousands)</u>							Increase (Decr	<u>ease)</u>			
Gross Profit	2020	%	2019		%		Amount	%			
North American OTC Healthcare	\$ 370,072	58.0	\$	363,875	56.9	\$	6,197	1.7

	\$ 410,416	58.2	\$	408,313	57.4	\$	2,103	0.5			

Gross profit for the nine months ended December 31, 2020 increased \$2.1 million, or 0.5%, when compared with the nine months ended December 31, 2019. The increase in gross profit was due to the increase in the North American OTC Healthcare segment. As a percentage of total revenues, gross profit increased to 58.2% during the nine months ended December 31, 2020, from 57.4% during the nine months ended December 31, 2019. The increase in gross profit as a percentage of revenues was primarily a result of the fourth quarter 2020 completion of transitional costs associated with a new warehouse and distribution center and improved logistics costs resulting from our warehouse transition.

North American OTC Healthcare Segment

Gross profit for the North American OTC Healthcare segment increased \$6.2 million, or 1.7%, during the nine months ended December 31, 2020 versus the nine months ended December 31, 2019. As a percentage of North American OTC Healthcare revenues, gross profit increased to 58.0% during the nine months ended December 31, 2020 from 56.9% during the nine months ended December 31, 2020 from 56.9% during the nine months ended December 31, 2019, primarily due to the fourth quarter completion of transitional costs associated with a new warehouse and distribution center and improved logistics costs resulting from our warehouse transition.

International OTC Healthcare Segment

Gross profit for the International OTC Healthcare segment decreased \$4.1 million, or 9.2%, during the nine months ended December 31, 2019. As a percentage of International OTC Healthcare revenues, gross profit decreased to 59.5% during the nine months ended December 31, 2020 from 61.5% during the nine months ended December 31, 2019, primarily due to product mix.

Contribution Margin

Contribution margin is our segment measure of profitability. It is defined as gross profit less advertising and marketing expenses.

The following table presents our contribution margin and contribution margin as a percentage of total segment revenues, by segment for each of the periods presented.

	Nine Months Ended December 31,								
<u>(In thousands)</u>						Increase (Decrease)			
Contribution Margin	2020		2019		% Amount		Amount	%	
North American OTC Healthcare	\$ 278,519	43.7	\$	269,241	42.1	\$	9,278	3.4	
International OTC Healthcare	27,725	40.9		32,045	44.4		(4,320)	(13.5)	
	\$ 306,244	43.4	\$	301,286	42.3	\$	4,958	1.6	

North American OTC Healthcare Segment

Contribution margin for the North American OTC Healthcare segment increased \$9.3 million, or 3.4%, during the nine months ended December 31, 2020 versus the nine months ended December 31, 2019. As a percentage of North American OTC Healthcare revenues, contribution margin increased to 43.7% during the nine months ended December 31, 2020 from 42.1% during the nine months ended December 31, 2019. The contribution margin increase as a percentage of revenues was primarily due to the increase in gross profit noted above as well as a decrease in the first quarter of 2021 in advertising and marketing reflecting spend efficiencies and reductions across brands/categories driven by consumer behavior.

International OTC Healthcare Segment

Contribution margin for the International OTC Healthcare segment decreased \$4.3 million, or 13.5%, during the nine months ended December 31, 2020 versus the nine months ended December 31, 2019. As a percentage of International OTC Healthcare revenues, contribution margin decreased to 40.9% during the nine months ended December 31, 2020 from 44.4% during the

nine months ended December 31, 2019. The contribution margin decrease as a percentage of revenues was primarily due to the decrease in gross profit noted above.

General and Administrative

General and administrative expenses decreased \$3.8 million, or 5.8%, during the nine months ended December 31, 2020 versus the nine months ended December 31, 2019. The decrease in general and administrative expenses was primarily due to decreases in compensation costs resulting from attrition as well as reduced travel costs relating to COVID-19.

Depreciation and Amortization

Depreciation and amortization expenses were \$18.1 million for the nine months ended December 31, 2020 and \$18.5 million for the nine months ended December 31, 2019. The decrease in depreciation and amortization expenses was primarily due to certain assets being fully depreciated in the first quarter of fiscal 2021.

Interest Expense, Net

Interest expense, net was \$63.3 million during the nine months ended December 31, 2020, versus \$73.8 million during the nine months ended December 31, 2019. The average indebtedness decreased to \$1.6 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2020 from \$1.8 billion during the nine months ended December 31, 2019.

Loss on Extinguishment of Debt

During the nine months ended December 31, 2019, we recorded a loss on extinguishment of debt of \$2.2 million to write off the debt costs related to our 5.375% 2013 Senior Notes, which we redeemed in December 2019.

Income Taxes

The provision for income taxes during the nine months ended December 31, 2020 was \$34.6 million versus \$35.4 million during the nine months ended December 31, 2019. The effective tax rate during the nine months ended December 31, 2020 was 21.1% versus 25.2% during the nine months ended December 31, 2019. The decrease in the effective tax rate for the nine months ended December 31, 2020 was primarily due to the application of final tax regulations issued for GILTI, and the discrete event pertaining to the release of the valuation allowance on prior year foreign tax credits.

Liquidity and Capital Resources

Liquidity

Our primary source of cash comes from our cash flow from operations. In the past, we have supplemented this source of cash with various debt facilities, primarily in connection with acquisitions. We have financed our operations, and expect to continue to finance our operations over the next twelve months, with a combination of funds generated from operations and borrowings. Our principal uses of cash are for operating expenses, debt service, share repurchases, capital expenditures, and acquisitions. Based on our current levels of operations and anticipated growth, excluding acquisitions, we believe that our cash generated from operations and our existing credit facilities will be adequate to finance our working capital and capital expenditures through the next twelve months. See "Coronavirus Outbreak" above.

As of December 31, 2020, we had cash and cash equivalents of \$62.1 million, a decrease of \$32.7 million from March 31, 2020. The following table summarizes the change:

		Nine Months Ended December 31,					
<u>(In thousands)</u>		2020		2019		\$ Change	
Cash provided by (used in):							
Operating Activities	\$	176,520	\$	160,998	\$	15,522	
Investing Activities		(17,347)		(8,305)		(9,042)	
Financing Activities		(195,710)		(151,988)		(43,722)	
Effects of exchange rate changes on cash and cash equivalents		3,880		356		3,524	
Net change in cash and cash equivalents	\$	(32,657)	\$	1,061	\$	(33,718)	

Operating Activities

Net cash provided by operating activities was \$176.5 million for the nine months ended December 31, 2020, compared to \$161.0 million for the nine months ended December 31, 2019. The \$15.5 million increase was due to an increase in net income after non-cash items partly offset by increased working capital.

Investing Activities

Net cash used in investing activities was \$17.3 million for the nine months ended December 31, 2020, compared to \$8.3 million for the nine months ended December 31, 2019. The increase was due to an increase in capital expenditures in the current period.

Financing Activities

Net cash used in financing activities was \$195.7 million for the nine months ended December 31, 2020, compared to \$152.0 million for the nine months ended December 31, 2019. The increase was primarily due to increased repayments of debt of \$59.0 million and decreased borrowings of \$30.0 million in the nine months ended December 31, 2020, partly offset by a decrease in our repurchase of common stock of \$40.1 million compared to the prior period as well as a payment of debt costs of \$5.8 million in the nine months ended December 31, 2019.

Capital Resources

As of December 31, 2020, we had an aggregate of \$1.6 billion of outstanding indebtedness, which consisted of the following:

- \$400.0 million of 5.125% 2019 Senior Notes, which mature on January 15, 2028;
- \$600.0 million of 6.375% 2016 Senior Notes, which mature on March 1, 2024; and
- \$560.0 million of borrowings under the 2012 Term B-5 Loans due January 26, 2024.

As of December 31, 2020, we had no balance outstanding on 2012 ABL Revolver and a borrowing capacity of \$123.3 million.

During the years ended March 31, 2020 and 2019, under the 2012 Term Loan, we made voluntary principal payments against outstanding indebtedness of \$48.0 million and \$200.0 million, respectively. During the nine months ended December 31, 2020, we made voluntary principal payments against outstanding indebtedness of \$130.0 million under the 2012 Term Loan. Under the Term Loan Amendment No. 5, we are required to make quarterly payments each equal to 0.25% of the aggregate principal amount, which, as of December 31, 2020, was \$560.0 million. Since we have made optional payments this year and in prior years that exceed a significant portion of our required quarterly payments, we will not be required to make another payment on the 2012 Term Loan until maturity on January 26, 2024.

Maturities:

Covenants:

Our debt facilities contain various financial covenants, including provisions that require us to maintain certain leverage, interest coverage and fixed charge ratios. The credit agreement governing the 2012 Term Loan and the 2012 ABL Revolver and the indentures governing the 2016 Senior Notes and 2019 Senior Notes contain provisions that accelerate our indebtedness on certain changes in control and restrict us from undertaking specified corporate actions, including asset dispositions, acquisitions, payments of dividends and other specified payments, repurchasing our equity securities in the public markets, incurrence of indebtedness, creation of liens, making loans and investments and transactions with affiliates. Specifically, we must:

• Have a leverage ratio of less than 6.50 to 1.0 for the quarter ended December 31, 2020 and thereafter (defined as, with certain adjustments, the ratio of our consolidated total net debt as of the last day of the fiscal quarter to our trailing twelve month consolidated net income before interest, taxes, depreciation, amortization, non-cash charges and certain other items ("EBITDA"));

- Have an interest coverage ratio of greater than 2.25 to 1.0 for the quarter ended December 31, 2020 and thereafter (defined as, with certain adjustments, the ratio of our consolidated EBITDA to our trailing twelve month consolidated cash interest expense); and
- Have a fixed charge ratio of greater than 1.0 to 1.0 for the quarter ended December 31, 2020 (defined as, with certain adjustments, the ratio of our consolidated EBITDA minus capital expenditures to our trailing twelve month consolidated interest paid, taxes paid and other specified payments). Our fixed charge requirement remains level throughout the term of the debt facilities.

At December 31, 2020, we were in compliance with the applicable financial and restrictive covenants under the 2012 Term Loan and the 2012 ABL Revolver and the indentures governing the 2016 Senior Notes and the 2019 Senior Notes. Additionally, management anticipates that in the normal course of operations, we will be in compliance with the financial and restrictive covenants during the next twelve months.

Interest Rate Swaps:

We have had two interest rate swaps to hedge a total of \$400.0 million of our variable interest debt. Of these, \$200.0 million matured on January 31, 2021 and \$200.0 million matures on January 31, 2022.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements or financing activities with special-purpose entities.

Critical Accounting Policies and Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on our knowledge of current events and actions that we may undertake in the future, actual results could differ from those estimates. A summary of our critical accounting policies is presented in our Annual Report on Form 10-K for the fiscal year ended March 31, 2020. There were no material changes to our critical accounting policies during the nine months ended December 31, 2020.

Recent Accounting Pronouncements

A description of recently issued and recently adopted accounting pronouncements is included in the notes to the unaudited Condensed Consolidated Financial Statements in Part I, Item I, Note 1 of this Quarterly Report on Form 10-Q.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 (the "PSLRA"), including, without limitation, information within Management's Discussion and Analysis of Financial Condition and Results of Operations. The following cautionary statements are being made pursuant to the provisions of the PSLRA and with the intention of obtaining the benefits of the "safe harbor" provisions of the PSLRA.

Forward-looking statements speak only as of the date of this Quarterly Report on Form 10-Q. Except as required under federal securities laws and the rules and regulations of the SEC, we do not intend to update any forward-looking statements to reflect events or circumstances arising after the date of this Quarterly Report on Form 10-Q, whether as a result of new information, future events or otherwise. As a result of these risks and uncertainties, readers are cautioned not to place undue reliance on forward-looking statements included in this Quarterly Report on Form 10-Q or that may be made elsewhere from time to time by, or on behalf of, us. All forward-looking statements attributable to us are expressly qualified by these cautionary statements.

These forward-looking statements generally can be identified by the use of words or phrases such as "believe," "anticipate," "expect," "estimate," "project," "intend," "strategy," "goal," "future," "seek," "may," "should," "would," "will," or other similar words and phrases. Forward-looking statements are based on current expectations and assumptions that are subject to a number of risks and uncertainties that could cause actual results to differ materially from those anticipated, including, without limitation:

- The impact of the COVID-19 pandemic or other disease outbreaks on global economic conditions, consumer demand, retailer product availability, and business operations including manufacturing, supply chain and distribution;
- The high level of competition in our industry and markets;
- Our inability to increase organic growth via new product introductions, line extensions, increased spending on advertising and marketing support, and other new sales and marketing strategies;
- Our dependence on a limited number of customers for a large portion of our sales;
- · Our inability to successfully identify, negotiate, complete and integrate suitable acquisition candidates and to obtain necessary financing;
- Our inability to invest successfully in research and development to develop new products;
- Changes in inventory management practices by retailers;
- Our inability to grow our international sales;
- · General economic conditions and incidence levels affecting sales of our products and their respective markets;
- · Economic factors, such as increases in interest rates and currency exchange rate fluctuations;
- Changing consumer trends, additional store brand or branded competition or other pricing pressures which may cause us to lower our prices;
- Our dependence on third party manufacturers to produce many of the products we sell;
- Our dependence on third party logistics providers to distribute our products to customers;
- · Price increases for raw materials, labor, energy and transportation costs, and for other input costs;
- Disruptions in our distribution center or manufacturing facility;
- Shortages of supply of sourced goods;
- Acquisitions, dispositions or other strategic transactions diverting managerial resources, the incurrence of additional liabilities or problems associated with integration of those businesses and facilities;
- Actions of government agencies in connection with our products, advertising or regulatory matters governing our industry;
- Product liability claims, product recalls and related negative publicity;
- Our inability to protect our intellectual property rights;
- Our dependence on third parties for intellectual property relating to some of the products we sell;
- Our inability to protect our internal information technology systems;
- Our dependence on third party information technology service providers and their ability to protect against security threats and disruptions;
- Our assets being comprised virtually entirely of goodwill and intangibles and possible changes in their value based on adverse operating results and/or changes in the discount rate used to value our brands;
- Our dependence on key personnel;
- The costs associated with any claims in litigation or arbitration and any adverse judgments rendered in such litigation or arbitration;
- Our level of indebtedness and possible inability to service our debt;
- Our inability to obtain additional financing;
- · The restrictions imposed by our financing agreements on our operations; and
- Changes in federal, state and other geographic tax laws.

For more information, see Part I, Item 1A., "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended March 31, 2020.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Risk

We are exposed to changes in interest rates because our 2012 Term Loan and 2012 ABL Revolver are variable rate debt. To manage this risk, we use interest rate swaps to hedge a total of \$400.0 million of this variable rate debt. At December 31, 2020, approximately \$160.0 million of our debt carries a variable rate of interest.

Holding other variables constant, including levels of indebtedness, a 1.0% increase in interest rates on our variable rate debt would have an adverse impact on pre-tax earnings and cash flows for the three and nine months ended December 31, 2020 of approximately \$0.4 million and \$1.8 million, respectively.

Foreign Currency Exchange Rate Risk

During the three and nine months ended December 31, 2020, approximately 13.9% and 11.7%, respectively, of our gross revenues were denominated in currencies other than the U.S. Dollar. During the three and nine months ended December 31, 2019, approximately 12.7% and 11.6%, respectively, of our gross revenues were denominated in currencies other than the U.S. Dollar. As such, we are exposed to transactions that are sensitive to foreign currency exchange rates. These transactions are primarily with respect to the Canadian and Australian Dollars.

We performed a sensitivity analysis with respect to exchange rates for the three and nine months ended December 31, 2020 and 2019. Holding all other variables constant, and assuming a hypothetical 10.0% adverse change in foreign currency exchange rates, this analysis resulted in a less than 5.0% impact on pre-tax income of approximately \$1.2 million for the three months ended December 31, 2020 and approximately \$3.2 million for the nine months ended December 31, 2020. It represented a less than 5% impact on pre-tax income of approximately \$1.4 million for the three months ended December 31, 2019 and approximately \$4.0 million for the nine months ended December 31, 2019.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company's management, with the participation of its Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures, as defined in Rule 13a–15(e) of the Securities Exchange Act of 1934 (the "Exchange Act"), as of December 31, 2020. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2020, the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in the reports the Company files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting that occurred during the quarter ended December 31, 2020 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1A. RISK FACTORS

You should carefully consider the risk factors discussed in Part I, Item 1A. "Risk Factors" in our Annual Report on Form 10-K for the year ended March 31, 2020, which could materially affect our business, financial condition or future results of operations. The risk factors described in our Annual Report on Form 10-K have not materially changed in the period covered by this Quarterly Report on Form 10-Q, but such risks are not the only risks facing us. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and results of operations.

Our quarterly operating results and revenues may fluctuate as a result of any of these or other factors. Accordingly, results for any one quarter are not necessarily indicative of results to be expected for any other quarter or for any year, and revenues for any particular future period may decrease. In the future, operating results may fall below the expectations of securities analysts and investors. In that event, the market price of our outstanding securities could be adversely impacted.

ITEM 2. ISSUER PURCHASES OF EQUITY SECURITIES
